

## Php Surveyor

### **Description**

PHPSurveyor is a tool for creating online questionnaires. It enables you to collect, centralize and analyze questionnaires submitted by your visitors, and to analyze the results. Your surveys has never been that easy! It is very effective and offers a variety of options: sending of emails (thank-you note, reminders...), publishing your questionnaire online, managing the beginning and end date for your questionnaire, analyzing the results in graphs...

PHPSurveyor is not also limited in the number of questions or questionnaires.

### **Installation**

The installation procedure is the same for every module in OVH. You may see the manual here

### **Site**

Official site: <http://www.phpsurveyor.org>

Example: <http://www.votre-site-en-1-clic.com/phpsurveyor/>

Attention! You need to create the survey before you may display this page.

### **Administration**
